How to drill china/ceramic/glass/acrylic

Equipment and Materials:

- Cordless drill or drill press (slow speed)
- Spray bottle filled with water
- Diamond Core Bit (10.0mm) for drilling glass and tiles (approx \$20)

Method:

Wet the surface to be drilled (re-wet as necessary during drilling).

If using a cordless drill, start at a 45° degree angle and gradually straighten the power tool as you drill.

If using a drill press use a slow speed (600rpm).

How to drill steel and plastic

Equipment and Materials:

Cordless drill or drill press

High speed bit (10mm) approx \$10-\$12

Note:

Wear eye protection to guard against steel shavings. Vacuum or sweep up after drilling to avoid steel shavings lodging in footwear.
